

B2
cont'd

the anode and cathode assemblies forming a unidirectional electrode winding having two substantially straight sides, the assemblies having interposed therebetween at least one separator, the first length of the anode current collector being shorter than the third length of the cathode current collector, the [first] second height of the anode current collector being shorter than the third height of the cathode current collector.

Remarks

1. Claims 19 through 26 are cancelled. Further, claims 73, 74 and 82 are amended herein to particularly point out and distinctly claim the subject matter which the applicant regards as the invention. This amendment removes the rejection under 35 U.S.C. 112. Accordingly, claims 73 through 90 are in a condition for allowance.

Conclusion

The Examiner has indicated that claims 1 through 18 and 28 through 72 are allowed. Further, in light of the present amendment, claims 73 through 90 are also allowable. The Examiner has indicated that the declaration is defective because it does not list all those applications of which the present application is a continuation in part. To comply with this requirement, a declaration is attached listing all the relevant applications and documents to which the present application is related.

For all these reasons, allowance of claims 73 through 90, in addition to allowed claims 1 through 18 and 28 through 72, is respectfully solicited so that the application may pass to issue.

RECEIVED
JUL 17 2000
C 1700 MAIL ROOM

The Examiner is invited to telephone the undersigned if the Examiner believes it would be useful to advance prosecution.

Dated: 07/10/2000

Respectfully submitted,
